

Four-Stroke Air-Cooled Gasoline Engine

This is a single-cylinder, four-stroke gasoline engine with air cooling and a recoil starter. It is suitable for powering generators, water pumps, and various industrial equipment.

Product Overview

High-Performance Air-Cooled Engine

This four-stroke, air-cooled gasoline engine is engineered for versatility and reliability in demanding industrial environments. Designed for general-purpose applications, it serves as an ideal power source for generators, water pumps, and heavy-duty equipment. With a robust overhead valve (OHV) design and efficient electronic ignition, this engine ensures consistent performance and ease of operation for professional users.

Technical Specifications

Performance Highlights

13 HP

Max Power Output

Detailed Specifications

Specification	Value
Ignition System	Electronic
Cooling System	Air-Cooled
Design	Overhead Valve (OHV)

Engine Type: Four-Stroke, Air-Cooled

Features

Core Features: Oil Alert System, Electronic Ignition, Recoil Starter, Air-Cooled
