

Four-Stroke Diesel Engine

This diesel engine is a robust and efficient power source designed for various industrial applications. Its compact design allows for easy integration into existing machinery and features a liquid cooling system.

Overview

HF395D Industrial Diesel Engine

The HF395D is a robust four-stroke diesel engine engineered for reliable performance in demanding industrial environments. It balances power output with fuel efficiency, making it an ideal choice for generators, pumps, and diverse machinery. Designed for longevity and ease of use, it features a durable engine block and accessible service points to simplify routine maintenance.

Technical Specifications

Combustion Cycle	Four-Stroke
Cooling System	Liquid Cooled
Fuel Injection	High-Pressure System

Features

Maintenance Design

Accessible Service Points • Durable Construction

Suitable Applications	Generators, Pumps, Industrial Equipment
Starting Mechanism	Reliable Quick-Start System
