

Four-Stroke Gasoline Engine

This high-performance 4-stroke gasoline engine is designed for various applications. It delivers consistent power output and long-lasting performance, making it ideal for generators, water pumps, and other power equipment.

Overview

High-Performance 4-Stroke Engine

This versatile four-stroke gasoline engine is engineered for reliability and durability in demanding environments. Designed with an overhead valve (OHV) configuration, it offers improved combustion efficiency and consistent power output for applications like generators and water pumps. The unit features built-in protection mechanisms, including an automatic low oil level cut-off, ensuring long-lasting performance and reduced maintenance needs.

Performance

Power Output

6.5 HP

Rated Power

7 HP

Maximum Power

Engine Type

4-Stroke, Single Cylinder

Features

Safety & Protection

- Automatic low oil level cut-off
- Durable metal alloy crankcase
- Integrated air filtration system

Starting System

Recoil Start, Electric Start

Maintenance

Air Cleaner Maintenance

Action	Interval
Clean air cleaner	Every 3 months or 50 hours
Service frequency	Increase in dusty conditions

Operational Details

Operational Benefits

Low Fuel Consumption • Low Noise • Energy Saving • Environmentally Friendly

Recommended Oil	SAE30
