Product Overview

High-Performance Brush Cutter

This petrol-powered brush cutter is designed for efficient vegetation management, offering a robust solution for tackling tough weeds and brush. Engineered with a reliable single-cylinder, air-forced cooling engine, it balances power and operational longevity. Its ergonomic design is built to support professional landscapers and homeowners alike, ensuring comfort and control during extended maintenance tasks.

Engine Specifications

Engine Model	139F
Cooling System	Air-forced cool
Displacement	31 cc
