Overview

High-Performance Four-Stroke Water Pump

This robust four-stroke water pump is engineered for efficient water transfer across demanding environments, including irrigation, drainage, and construction sites. Its powerful engine ensures smooth, fuel-efficient operation, while the durable construction guarantees reliability in harsh conditions. Designed with portability in mind, the compact unit is easy to transport and operate, making it an ideal solution for both professional and domestic water management tasks.

Technical Specifications

Engine Type	4-Stroke
Power Source	Gasoline
Model Number	AW-WP25-40T

Features

Key Benefits

- Fuel-efficient operation
- Compact and portable design
- Durable construction
- Easy starting and operation

Suitable Applications	Irrigation, Drainage, Construction, Water Transfer
