

Four-Tier Steel Wire Shelving Unit

This four-tier shelving unit is constructed from durable steel with a wire mesh design. It is ideal for organizing tools, equipment, and supplies with adjustable shelf heights.

Product Overview

Heavy-Duty Storage Solution

This four-tier steel wire shelving unit is engineered for demanding storage environments, including warehouses, workshops, and garages. The robust steel construction features an open wire mesh design, which promotes airflow and ensures high visibility of stored inventory. With adjustable shelf heights, this unit provides versatile organization options for tools, equipment, and supplies, while the durable black finish offers essential corrosion resistance for long-term use.

Physical Specifications

Number of Tiers	4
Finish Type	Black corrosion-resistant finish
Material	Steel

Features

Ideal Applications

- Warehouses
- Workshops
- Garages
- Industrial Storage

Key Features

Adjustable Shelf Heights, Wire Mesh Design, Corrosion Resistant, Heavy-Duty Construction
