

Four-Way Brass Pipe Fitting with Compression Connections

This four-way brass fitting is designed for plumbing and piping applications. It features compression connections for secure and leak-proof joining of pipes.

Product Overview

Versatile Four-Way Brass Fitting

This four-way brass pipe fitting is engineered for robust plumbing and piping applications, facilitating the distribution of fluid or gas flow in multiple directions. Designed with reliable compression connections, it ensures a secure, leak-proof joint for complex piping networks. Constructed from high-quality brass, this fitting offers excellent corrosion resistance and long-lasting durability for demanding environments.

Technical Specifications

Material	Brass
Connection Type	Compression
Configuration	Four-Way

Key Features

Suitable Applications

- Plumbing Systems
- Piping Networks
- Fluid Distribution
- Gas Supply

Performance Attributes	Corrosion Resistant, Leak-Proof, Durable
