

# Four-Wheel Agricultural Tractor

This four-wheel tractor is designed for agricultural and industrial applications. It is equipped with a powerful engine and durable tires, making it suitable for plowing, tilling, and other heavy-duty tasks.

## Overview

### Versatile Agricultural Power

This four-wheel tractor is designed for both paddy and dry field operations, making it a highly adaptable tool for small to medium-sized farms. Powered by a three-cylinder diesel engine, it offers a balance of ample output, low vibration, and quiet operation. With a range of eight forward and two reverse gears, it supports diverse farming tasks including rototilling, plowing, harrowing, seeding, and inter-row cultivation.

## Engine & Performance

Engine Configuration	Three-cylinder diesel engine
Forward Gears	8
Reverse Gears	2
Speed Range	1.11 - 26.20 km/hr

## Features & Capabilities

### Key Operational Features

- Hydraulic power steering
- Two-speed PTO
- Linkage type double-acting clutch
- Dual-function for paddy and dry fields

### Optional Equipment

Air brake facilities

Primary Applications	Rototilling, Plowing, Harrowing, Seeding, Inter-row cultivation, Harvesting
Transport Safety	Yes
