

Four-Wheel Agricultural Tractor

This compact four-wheel tractor is designed for agricultural applications such as plowing and tilling. It features a robust engine, durable chassis, and efficient transmission.

Overview

High-Performance Agricultural Tractor

This compact four-wheel agricultural tractor is engineered for versatility and reliability in demanding farm environments. It features a robust diesel engine and a durable chassis, making it an ideal solution for essential tasks such as plowing, tilling, and general field work. Designed with operator comfort and efficiency in mind, this machine provides the power and stability required for consistent agricultural performance.

Technical Specifications

Model Designation	220 KHM
Engine Type	Diesel
Drive System	Four-Wheel Drive

Features

Design Highlights

- Robust chassis construction
- Efficient transmission system
- Vertical exhaust orientation
- Ergonomic operator seating

Primary Applications	Plowing, Tilling, General Farm Tasks
