

Four-Wheel Drive Agricultural Tractor

This tractor is a four-wheel drive vehicle designed for agricultural use. It provides power and traction for various farming tasks.

Overview

Versatile Four-Wheel Drive Agricultural Tractor

This robust four-wheel drive tractor is engineered for demanding agricultural environments, providing superior power and traction. Designed to handle various farming tasks, it is available in multiple power configurations to suit specific field requirements. Its durable construction and large, knobby tires ensure reliable performance even in challenging off-road conditions.
