

Fourteen-Passenger Compact Tour Bus

This compact tour bus efficiently transports up to fourteen passengers. It features a streamlined body, ergonomic seating, and a reliable powertrain optimized for fuel efficiency.

Overview

Compact Passenger Transport Solution

The Fourteen-Passenger Compact Tour Bus is designed for efficient, reliable transportation across various environments. Featuring a streamlined body for enhanced maneuverability and a robust chassis for stability, this vehicle is built for durability. The interior prioritizes passenger comfort with ergonomic seating and optimized legroom, making it an ideal choice for shuttle services, urban mobility, and tourist transport.

Technical Specifications

Passenger Capacity	14 passengers
Design Features	Streamlined Body, Robust Chassis, Ergonomic Seating

Performance & Safety

Safety Systems

- Advanced braking systems
- Passenger restraint systems

Performance Focus

Fuel Efficient • Low Emissions • Reliable Powertrain

Applications

Suitable Applications

- Tourist transport
- Shuttle services
- Urban mobility solutions
