

Frame Loaded Patch Rack for Cable Management

Frame-loaded patch racks organize and manage cable connections in laboratory or telecommunications settings. Their modular design allows easy installation and maintenance of patch cords, providing a structured cabling solution.

Overview

Professional Cable Management Solution

These frame-loaded patch racks are engineered for efficient cable organization in demanding laboratory and telecommunications environments. Featuring a modular design, they facilitate streamlined installation and simplified maintenance of patch cords. Built with durable materials, these racks provide a reliable and structured cabling solution for high-density connection requirements.

Technical Specifications

Available Configurations

- 100 Connections
- 300 Connections

Construction Quality

Durable Material • Industrial Grade

Primary Applications

- Laboratory Settings
- Telecommunications Infrastructure

Model Identifiers

KF-TJ-100(A), KF-TJ-300(A), KF TJ-100(8)
