

# FRC 02 Road Bicycle with Aluminum Frame

The FRC 02 road bicycle is constructed with a lightweight aluminum frame made from T6 6061 alloy. Its 700C wheels ensure a smooth and efficient ride for both recreational and competitive cycling.

## Overview

### Performance Road Bicycle

The FRC 02 is a high-performance road bicycle engineered for efficiency and durability. Built with a lightweight alloy frame and equipped with reliable components, it is designed to handle both recreational rides and competitive cycling demands. Its 700C wheelset ensures a smooth and fast ride, making it an excellent choice for cyclists seeking a balance of speed and comfort.
