

Freestanding Hot and Cold Water Dispenser with Purification

This freestanding water dispenser provides hot, cold, and ambient water options. It features a bottleless design with a reservoir for water purification or a direct connection to a water line.

Product Overview

Professional Water Dispenser Solution

This versatile freestanding water dispenser provides convenient access to hot, cold, and ambient temperature water for any home or office environment. Engineered with a bottleless design, it supports seamless integration with direct water lines or manual purification reservoirs. Enhanced with safety and maintenance features like a child lock and removable drip tray, it ensures a user-friendly and hygienic hydration experience.
