Overview

Professional Wine Preservation

This freestanding wine cooler provides a controlled environment for storing up to 186 wine bottles in a single temperature zone. Designed with an advanced foaming insulation layer and an active circulation fan, it ensures consistent cooling performance. Integrated digital controls and an activated carbon filter maintain the ideal climate for long-term collection preservation.

Technical Specifications

Bottle Capacity	186 bottles
Control Type	Digital Thermostat
Air Filtration	Yes

Construction

Interior Layout

- 4 Wooden wine racks
- Single temperature zone
- Advanced foaming insulation

Design Components	Stainless Steel Handle, Glass Door, LED Interior Light, Wooden Racks
