

Freestanding Wine Cooler with Digital Temperature Control

This freestanding wine cooler features multiple shelves and a black exterior with a glass door. It maintains a temperature range between 40-65°F using a compressor cooling system and digital temperature controls.

Product Overview

Professional Wine Storage Solution

The JCS-85 freestanding wine cooler provides an efficient and elegant storage solution for up to 28 bottles of wine. Equipped with precise digital temperature control, this unit maintains an ideal environment between 5-20°C to preserve the quality and flavor of your collection. Its compact, freestanding design and quiet, no-frost compressor cooling system make it a versatile addition to any professional or residential setting.
