

Freestanding Wine Cooler with Wooden Shelves

This freestanding wine cooler is designed with wooden shelves to store wine bottles horizontally. It features a temperature control panel, interior lighting, and a stainless steel frame with a glass door to maintain optimal temperature and humidity.

Product Overview

Professional Wine Preservation

This freestanding wine cooler is engineered for professional-grade storage, combining UV protection with vibration-dampening oak shelving. The integrated mesh refrigeration system ensures stable temperature control, while the humidity balance device maintains an ideal environment for long-term maturation. Designed with a sleek stainless steel frame and glass door, it is the perfect solution for maintaining the integrity of fine wine collections.
