

Freestyle BMX Bike with Caliper Brakes

This BMX bike features a durable steel frame and 20-inch wheels, ideal for freestyle riding. It is equipped with front and rear caliper brakes and BMX-style handlebars for enhanced control.

Overview

Freestyle BMX Performance

This freestyle BMX bike is engineered for durability and agility, featuring a lightweight 20-inch alloy frame and robust steel fork. Designed for performance, it includes a precise 25T gear setup and reliable alloy U-brakes for consistent stopping power. With high-traction Kanda tires and a comfortable Vader seat, this bike is built to handle the demands of freestyle riding and trick execution.
