

Front and Rear Parking Sensor System with LED Display

This parking sensor system features front and rear sensors for comprehensive coverage. The system includes an automatic radio mute function and two slim LED displays for visual distance alerts.

Product Overview

Professional Parking Assistance

This advanced parking sensor system provides comprehensive coverage for both the front and rear of your vehicle. Designed for seamless integration, it features an automatic radio mute function to ensure clear audio alerts during maneuvers. With dual slim LED displays, drivers receive precise visual distance indicators to improve safety and ease of parking.

Technical Specifications

Key Features

- Front and rear object detection
- Automatic radio mute function
- High-sensitivity sensors
- Dual slim LED indicators
- Easy vehicle electronics integration

Installation

Simplified Wiring • Universal Integration

Configuration

Front Sensors, Rear Sensors, Visual & Audio Alerts
