

# Front Brim Safety Helmet

This safety helmet is designed with a front brim for additional protection against glare and falling objects. Compliant with CE EN 397 standards, it features a durable outer shell and adjustable inner suspension.

## ADDITIONAL IMAGES

## Product Overview

### Professional Grade Head Protection

The HEP106 Front Brim Safety Helmet is engineered to meet rigorous CE EN397:2012+A1:2012 safety standards, ensuring reliable impact protection for industrial and construction environments. It features a durable ABS shell with a 6-point ratchet suspension system for a secure, customizable fit. Designed for all-day comfort, the helmet includes a foam-cushioned sweatband, integrated ventilation, and a rain trough to channel moisture away.
