

Front-Loading Automatic Washing Machine

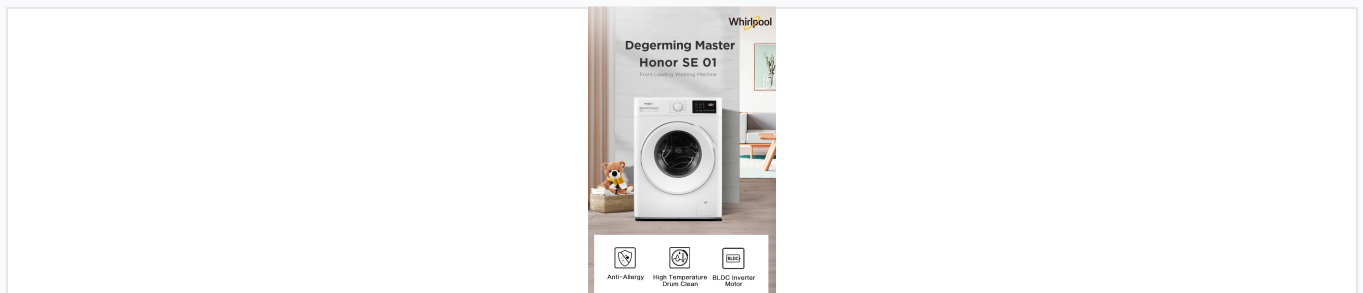

This front-loading washing machine features automatic operation and multiple wash cycles. It is designed for efficient water usage and gentle fabric handling.

ADDITIONAL IMAGES

Product Overview

Equipped with advanced degerming and anti-allergy systems for hygienic fabric care.

Professional Grade Front-Loading Washer

This fully automatic front-loading washing machine is engineered for superior cleaning performance and energy efficiency. Featuring a high-performance inverter motor, it provides quiet, reliable operation with advanced anti-allergy and sanitization cycles. The robust construction and intelligent control panel make it an ideal choice for high-demand home laundry environments.
