Product Overview

Professional Refrigerated Display Solution

This front-open refrigerated display case is engineered for high-visibility merchandising of cakes, sandwiches, and pastries in commercial settings like cafes and delis. It features an integrated wind curtain system that maintains consistent temperature and humidity levels, ensuring optimal food freshness. The open-front design facilitates convenient self-service access, while the durable construction and adjustable shelving make it a versatile choice for any food service establishment.

Key Features

Core Functionalities

- Wind curtain technology for temperature stability
- Open-front design for easy self-service access
- Adjustable shelving for flexible display options
- Integrated interior lighting
- Digital temperature control panel

Technical Specifications

Construction Materials
