

Fruit and Vegetable Juice Extractor

This juice extractor efficiently separates juice from pulp in fruits and vegetables. It is designed for commercial use, providing a high yield of juice and easy maintenance.

Product Overview

Professional Juice Extraction

This high-performance fruit and vegetable juice extractor is designed for efficient, daily use in busy environments. Featuring a robust motor and a large feed tube, it accommodates whole fruits like apples with ease, minimizing prep time. The stainless steel micro-mesh filter ensures high juice yield, while the safety-focused design provides reliability for operators.
