

Fruit and Vegetable Washing and Processing Line

Industrial washing and processing machinery designed for fruits and vegetables. Constructed from stainless steel, this equipment features a conveyor system for continuous operation.

Product Overview

Industrial Processing Solution

This industrial washing and processing line is expertly engineered for the efficient handling of fruits and vegetables. Built with high-quality stainless steel, the system ensures durability and hygiene for large-scale food processing environments. It features an integrated conveyor system designed to support continuous, high-volume production workflows.

Technical Specifications

Key Components

- Integrated Conveyor System
- Washing Unit
- Processing Module

Construction Material	Stainless Steel
Operational Mode	Continuous

Application

Primary Application	Fruit Processing, Vegetable Processing, Large-scale Food Production
