

FS-SYV Series Sheathed Coaxial Cable

The FS-SYV series sheathed coaxial cable is designed for signal transmission. It features protection against interference and environmental factors with its PVC sheath, aluminum mylar shielding and PE insulation.

Product Overview

FS-SYV Series Sheathed Coaxial Cable

The FS-SYV series sheathed coaxial cable is engineered for reliable signal transmission in demanding environments. Featuring a robust construction with a PVC sheath, aluminum mylar shielding, and plain copper wire braiding, this cable ensures superior protection against electromagnetic interference. It utilizes high-quality PE insulation and a copper conductor to maintain signal integrity, making it an ideal choice for waterproof cable applications.

Technical Specifications

Category

Waterproof Cable • Coaxial Cable

Product Standard

GB/T 14864-1993

Construction Details

Components

- PVC Sheath
- Aluminum Mylar Shielding
- Plain Copper Wire Braiding
- PE Insulation
- Copper Conductor
