

FTP Cat.5e Shielded Ethernet Patch Cord

This high-performance FTP Cat.5e patch cord is designed for reliable data transmission in networking applications. It features shielded twisted pair (FTP) construction to minimize electromagnetic interference and ensure optimal signal integrity.

Product Overview

High-Performance Data Connectivity

This FTP Cat.5e patch cord is engineered for reliable data transmission in professional networking environments. Its shielded twisted pair construction significantly minimizes electromagnetic interference, ensuring optimal signal integrity for your network infrastructure. Capable of supporting data rates up to 1 Gbps, it provides a stable connection for routers, switches, and workstations.

Technical Specifications

Category

Cat.5e

Cable Type

FTP (Foiled Twisted Pair)

Performance

Maximum Data Rate

1 Gbps

Max Data Rate

Connectivity

Connector Type

RJ45

Features

Key Features

- Shielded twisted pair construction
- EMI interference reduction
- High signal integrity
- Universal device compatibility

Applications

Suitable Environments

Office, Home, Data Center
