

Fuel Dispenser

This machine dispenses various types of fuel, including gasoline, diesel, and alternative fuels, into vehicles. It is a standard piece of equipment at filling stations.

Product Overview

Industrial Grade Fuel Dispenser

This high-performance fuel dispenser is engineered for reliability and precision at commercial filling stations. It is compatible with a wide array of fuels including gasoline, diesel, ethanol, and biofuels, making it a versatile solution for modern fuel management. The unit features a clear interface for displaying transaction details such as total volume and price, ensuring transparency and ease of use for both operators and customers.
