

# Fuel Dispenser for Commercial and Retail Applications

This fuel dispenser is a high-performance solution for commercial and retail applications. Its robust construction ensures durability and reliable, accurate fuel delivery.

## Product Overview

### High-Performance Fuel Dispensing Solution

The SK65 Fuel Dispenser is a robust, high-performance solution engineered for commercial and retail fueling environments. It features an advanced metering system for precise fuel measurement to maximize revenue and minimize losses. Designed for durability, the unit offers a modular architecture that simplifies maintenance and reduces operational downtime.

## Technical Features

### Key Functional Features

- Advanced high-precision metering system
- User-friendly interface with clear volume and price display
- Modular design for simplified maintenance and upgrades
- Automatic shut-off mechanisms
- Emergency stop button integration

## Applications

### Suitable Applications

Retail Gas Stations, Commercial Fleet Fueling, High-Volume Fuel Sites

## Operational Specifications

### Versatility

Feature Category	Capabilities
Fuel Compatibility	Multi-fuel type support
Nozzle Options	Multiple configurations available
Safety	Emergency stop & Auto shut-off
