

Fuel Dispenser for Gasoline and Diesel

Fuel dispenser designed for dispensing both gasoline and diesel fuels. It includes two separate fueling points, one for gasoline and one for diesel.

Overview

Professional Fuel Dispensing Solution

This dual-purpose fuel dispenser is engineered for reliable handling of both gasoline and diesel. It features integrated digital monitoring to track essential transaction data including total sale amount, volume dispensed, and unit pricing. Designed for efficiency, the unit supports simultaneous dispensing from two points, making it a robust choice for commercial fueling environments.

Key Features

Digital Display Readouts

- Sale amount
- Liters dispensed
- Price per unit

Compatible Fuels

Gasoline, Diesel
