

Fuel Dispenser - Starlight Series

This fuel dispenser is a robust and reliable solution for various applications. It features durable construction, precise measurement capabilities, and a user-friendly interface for accurate and efficient fuel delivery.

Product Overview

Starlight Series Fuel Dispenser

The Starlight Series JDK50C222S is a robust and reliable fuel dispensing solution designed for a wide range of applications. This unit features durable construction, precise measurement capabilities, and a user-friendly interface. Engineered for accurate and efficient fuel delivery, it is an ideal choice for gas stations, commercial fleets, and industrial fuel management systems.

Key Features

Best For

- Gas stations
- Commercial fleets
- Industrial fuel management

Operational Features

High-flow nozzle, Electronic calibration, Secure data management, Leak prevention, Spill prevention

Technical Details

Design Focus

Durable Construction • Precision Measurement

Model Number

JDK50C222S
