

Fuel Dispenser with Dual Hose

This fuel dispenser is designed for both gasoline and diesel fuel. It features a dual-hose configuration, allowing for simultaneous dispensing of both fuel types.

Product Overview

Dual-Hose Fuel Dispensing Solution

This fuel dispenser provides a versatile and efficient solution for modern fueling stations, supporting both gasoline and diesel operations. Equipped with a dual-hose configuration, it allows for the simultaneous dispensing of two fuel types to maximize throughput. The integrated digital interface clearly displays the sale amount, volume in liters, and current price per unit for full transaction transparency.
