

Fuel Dispenser with Multiple Nozzles

This fuel dispenser is designed with multiple nozzles for dispensing different types of fuel. The dispenser includes a display screen for showing transaction information and a control panel for operation.

Overview

Professional Fuel Dispensing Solution

This fuel dispenser is engineered for high-demand environments such as commercial gas stations and private fleet facilities. It features a multi-nozzle configuration to accommodate diverse fuel types, streamlining refueling operations. Equipped with an integrated display screen and an intuitive control panel, the unit provides real-time transaction tracking and reliable performance for professional operators.
