Overview

Professional Fuel Dispensing Solution

This fuel dispenser is engineered for accurate and reliable fluid management in demanding retail and industrial environments. Featuring robust construction and precision-engineered internal components, it ensures consistent flow and measurement. The system includes modular configuration options to suit various operational requirements, providing a durable and efficient solution for fuel delivery.

Standard Configuration

Meter	MJ-65 Meter
Pump	ZYB-50 Vane Pump
Motor Voltage	AC380V \pm 20% 50HZ
Hose Specifications	3/4 inch, 4 meters
Automatic Nozzle	TD-20A

Alternative Configurations

Available Meter & Pump Combinations

- MJ-85S Meter + ZCB-90 Gear Pump
- MJ-55 Meter + ZCH-50 Gear Pump
- MJ-85S Meter + QYB-240R Submersible Pump

Alternative Motor Voltage	AC220V \pm 20% 50HZ
Alternative Nozzle	XIDE-80

Features & Accessories

Safety & Handling Features	Breakaway Valve, Swivel Connector, Ex-Proof Motor
