

Fuel Dispensing Nozzle

This single-nozzle fuel dispensing unit ensures accurate and reliable fuel delivery. Featuring a robust construction, it offers a clear display and user-friendly interface for efficient and safe refueling.

Product Overview

Professional Fuel Dispensing Solution

The JDK50D111 is a high-performance single-nozzle fuel dispensing unit engineered for precision and reliability in demanding refueling environments. Designed with a robust construction, it ensures long-term durability and consistent operation. The unit features an intuitive interface and clear display, facilitating seamless monitoring of fuel volume and pricing for both operators and end-users.

Technical Details

Model Number	JDK50D111
Nozzle Configuration	1

Key Features

Key Capabilities

- Accurate fuel delivery
- Robust, durable construction
- Clear volume and price display
- User-friendly interface
