Product Overview

Professional Fuel Dispensing Solution

The 11A Automatic Fuel Nozzle is a versatile and efficient tool designed for high-accuracy fuel transfer in commercial and industrial environments. Engineered for durability and convenience, this nozzle features a lightweight, compact design that simplifies handling while maintaining robust performance. With integrated safety features like automatic shut-off and inlet filtration, it ensures clean, controlled, and spill-free fueling for gasoline, diesel, and kerosene applications.

Technical Specifications

Compatible Fuel Types	Gasoline, Diesel, Kerosene
Flow Control Levels	3
Automatic Shut-Off	Yes
Inlet Filtration	Yes
