

Fuel Dispensing System

This system is designed for dispensing fuel in a controlled manner. It is suitable for use in petrol service stations and industrial facilities.

Product Overview

Professional Fuel Dispensing Solution

This fuel dispensing system is designed for efficient and reliable liquid fuel transfer in commercial and industrial environments. It supports both gasoline and gas applications, ensuring versatility for varied refueling requirements. Built for durability and performance, this unit provides a robust solution for professional fuel management operations.

Technical Specifications

Fuel Compatibility	Gasoline, Gas
System Type	Fuel Dispensing Pump
