

# Fuel Dispensing Unit

This is a self-contained unit designed for dispensing fuel. It features an electronic display for volume and price, a nozzle with a hose for fuel delivery.

## Product Overview

### Professional Fuel Dispensing Solution

This fuel dispensing unit is a robust, self-contained system engineered for high-accuracy fuel delivery in demanding environments like gas stations and private fueling facilities. Designed for durability and ease of use, it features an intuitive electronic display for precise monitoring of volume and price. The unit is built with high-quality components to ensure reliable operation and controlled dispensing for various vehicle types.

## Technical Features

### System Capabilities
