

Fuel Dispensing Unit with Card Reader

This fuel dispensing unit offers dual fuel grade selection (93 and 97 octane) and electronic displays for volume and price. It is designed for commercial fuel stations, providing accurate and secure fuel delivery with a card reader interface.

Product Overview

Professional Fuel Dispensing Solution

This advanced fuel dispensing unit is designed specifically for commercial fuel stations, combining robust construction with modern payment integration. Featuring a dual-grade selection system for 93 and 97 octane fuels, it ensures versatility for diverse vehicle requirements. The integrated card reader interface and electronic display panels provide a secure and efficient fueling experience for end-users, while the durable L-cabinet design is optimized for tanker connections.
