

Fuel Dispensing Unit with Dual Nozzles

This fuel dispensing unit is equipped with two nozzles for efficient service. It features a display showing volume, sale amount, and price.

Product Overview

Dual-Nozzle Efficiency

The JDK50J222 fuel dispensing unit is designed for high-throughput environments such as commercial gas stations. Featuring a dual-nozzle configuration, it allows for simultaneous fueling operations, significantly reducing wait times. The unit is built with a robust, weather-resistant exterior suitable for long-term outdoor deployment.
