

Fuel Dispensing Unit

This is a fuel dispensing unit. It includes a detailed technical diagram showcasing its dimensions and internal components.

Product Overview

Professional Fuel Dispensing Unit

This fuel dispensing unit is engineered for precision and reliability in professional industrial environments. Designed with a modular structure, it includes integrated nozzle systems and a clear display panel for efficient operation. Its robust internal layout supports high-performance fuel management, making it an essential component for streamlined fueling operations.

Technical Dimensions

Dimension A	1 mm
Dimension B	1 mm
Dimension C	1 mm

Key Features

Core Functionalities

- Integrated nozzle dispensing system
- Digital display panel
- Modular internal architecture
- Designed for industrial integration
