Product Overview

Precision Fuel Injection Plunger

This high-precision fuel injection plunger is engineered for 320D pump systems, ensuring reliable performance in demanding excavator applications. Constructed from high-speed steel, it is designed to meet strict tolerance requirements for optimal hydraulic pressure. With a wide range of size variants available from 7.990mm to 8.005mm, it provides the versatility needed for professional repair and maintenance.

Technical Specifications

Precision-engineered fuel injection plunger for 320D pump systems.

Available Diameter Sizes

- 7.99
- 7.991
- 7.992
- 0.993
- 7.994
- 7.995
- 7.996
- 7.997
- 7.998
- 7.999
- 8
- 8.001
- 8.002
- 8.003
- 8.004
- 8.005

Material

High speed steel
