

Fuel Injection Plunger for Diesel Engines

This fuel injection plunger is designed for diesel engines. It ensures optimal fuel delivery and maintains the efficiency and reliability of the engine.

Product Overview

High-Precision Fuel Injection Component

This high-precision fuel injection plunger is engineered for optimal fuel delivery and consistent engine performance. Designed for 4-stroke diesel engines, it utilizes durable Gcr15 material to withstand the demanding conditions of fuel injection systems. This component ensures reliable operation and efficiency, meeting rigorous manufacturing standards for long-lasting service.

Technical Specifications

Model Number	131151-9720
OEM Reference	A115
Plunger Diameter	12 mm
Material	Gcr15
Body Material	Aluminium

Engine Compatibility

Engine Type	4-Stroke Diesel
Cylinder Configuration	Multi-cylinder

Compliance & Quality

Color/Finish	Silver
Certifications	ISO9001
