

Fuel Injection Pump 131151-5820 A74 for Isuzu 6D105 Diesel Engine

Fuel injection pump 131151-5820 A74 is specifically designed for Isuzu 6D105 diesel engines. It ensures optimal fuel delivery and combustion for enhanced engine performance.

Product Overview

Precision Fuel Injection Component

This high-precision fuel injection component is engineered specifically for the Isuzu 6D105 diesel engine. Designed for reliability and optimal combustion, it ensures consistent fuel delivery to support engine performance. Built with durable materials and adhering to strict quality standards, this part is an essential replacement for maintaining heavy-duty diesel engine efficiency.

Technical Specifications

Part Number	131151-5820 A74
Compatible Engine	Isuzu 6D105
Plunger Diameter	12 mm
Material	Gcr15 Steel / Aluminium
Stroke Type	4 Stroke
Cylinder Configuration	Multi-cylinder

Certifications & Quality

Fuel Compatibility

Diesel

Certifications	ISO9001
