

Fuel Injection Pump Element for ISUZU S6D105 Engine

This fuel injection pump element is designed for ISUZU S6D105 engines. It ensures optimal fuel delivery and engine performance.

Product Overview

High-Performance Fuel Injection Component

This fuel injection pump element is designed specifically for the S6D105 engine, providing reliable and precise fuel delivery for multi-cylinder diesel systems. Engineered from high-grade Gcr15 material, the component is built to withstand the rigors of heavy-duty operations. It serves as a vital replacement part to maintain optimal combustion efficiency and engine longevity in 4-stroke machinery.

Technical Specifications

Model Number	131151-6320 (A79)
Plunger Diameter	12 mm
Material	Gcr15 Steel
Compatible Engine	ISUZU S6D105

Performance Features

Key Performance Metrics

4 cycle

Stroke Type

12 mm

Diameter

Compliance & Quality

Certifications	ISO 9001, SGS
