

Fuel Injection Pump Tester

This fuel injection pump tester diagnoses fuel injection system issues. It accurately measures fuel pressure to identify faulty pumps, regulators, or leaks.

Product Overview

Professional Fuel Injection Diagnostic Kit

The TU-114 Fuel Injection Pump Tester is a professional-grade diagnostic instrument engineered to accurately measure fuel system pressure. This comprehensive kit assists mechanics and technicians in identifying faulty fuel pumps, pressure regulators, and potential leaks within the fuel delivery system. Packaged in a durable carrying case, it provides a versatile solution for troubleshooting a wide range of vehicle fuel systems.

Key Features

Included Components

- Pressure Gauge
- Assorted Adapters
- Fittings
- Durable Carrying Case

Diagnostic Capabilities

Fuel Pump Testing, Regulator Diagnostics, Leak Detection, Pressure Measurement

Equipment Specifications

Target Audience

Professional Mechanics • DIY Enthusiasts
