Product Overview

Precision Calibration Shim Kit

This high-precision calibration shim kit is designed specifically for 120 series fuel injectors. These kits contain shims of varying thicknesses to allow for fine-tuning and adjustment of fuel injector performance, ensuring optimal fuel delivery and engine efficiency. Each kit is manufactured to strict standards, making them essential for professional maintenance and calibration in automotive applications.

Technical Specifications

Shim Accuracy and Model Specs

Model	Accuracy
B26	0.010 mm
B14	0.020 mm
B16	0.010 mm
B13	0.020 mm
B22	0.020 mm

Series Compatibility	120 Series
Key Features	High-Precision, International Standards, Calibration Grade
