

Fuel Injector Middle Plate 17.5

This fuel injector middle plate 17.5 is designed for use in fuel injection systems. It is compatible with 324D, 325D, 329D, 330D, and 336D excavator models.

Product Overview

High-Precision Fuel Injector Component

This 17.5 middle plate is a critical replacement component engineered for fuel injection systems in heavy construction machinery. Manufactured from high-speed steel, it ensures durability and consistent performance for demanding excavator engines. This part is designed for seamless integration and repair within various engine configurations to maintain optimal fuel delivery efficiency.

Technical Specifications

Detailed view of the 17.5 middle plate component for excavator fuel systems.

Material	High speed steel
Compatible Excavator Models	324D, 325D, 329D, 330D, 336D
Compatible Engines	C7, C9
