

Fuel Pump for Wheel Loaders

This fuel pump is designed to deliver fuel to the engine in wheel loaders. It ensures optimal performance and reliability by providing the necessary pressure for efficient combustion.

Product Overview

High-Performance Fuel Delivery

This fuel pump is a critical component designed to ensure consistent fuel delivery and optimal engine performance for heavy-duty wheel loaders. Engineered for reliability, it maintains the necessary pressure for efficient combustion in demanding engineering environments. This replacement part is built to meet rigorous operational standards, providing a dependable solution for equipment maintenance and repair.

Technical Details

Part Number	21635801
Compatible Equipment	Wheel Loader

Quality & Compliance

Certifications

CE • ISO

Warranty Coverage

- 6 months warranty for main spare parts
- 100% compensation for incorrect parts
- 100% compensation for damage due to poor packaging

Service & Logistics

Service Highlights

- Five-stage inspection process
- Detailed photo and video documentation before shipping
- Fast delivery options
- Lifetime after-sales support
