

Fuel Tank - Rectangular Metal with Red Finish

This fuel tank is made of metal and has a red finish. It features a rectangular shape with rounded edges and a silver cap.

Product Overview

Rugged Metal Fuel Storage

This rectangular metal fuel tank is engineered for durability and reliable performance in demanding environments. Featuring a high-visibility glossy red finish, it is designed for secure fluid storage with an integrated silver filler cap. The inclusion of dedicated mounting holes facilitates a straightforward installation process for various industrial or commercial applications.
