Overview

Efficient Fuel Transfer Solution

This self-priming rotary vane pump assembly is designed for reliable and accurate fuel dispensing in industrial, agricultural, and construction environments. It features a robust cast iron body with anti-corrosion paint, ensuring durability for long-term use. The system integrates a digital flow meter, automatic shut-off nozzle, and flexible hose assembly, making it a practical choice for transferring diesel and gasoline with ease.

Performance Metrics

Flow Rate

20 L/Min
Min Flow Rate

120 L/Min
Max Flow Rate

Max Operating Pressure

3.5 bar

Technical Specifications

Voltage	220V
Meter Readout	4-digit subtotal, 8-digit total
Pump Body Material	Cast iron with anti-corrosion paint

Included Components

Package Contents

- Self-priming rotary vane pump
- OGM-25 flow meter
- 4M delivery rubber hose
- 2M inlet clean plastic hose
- Automatic shut-off fuel nozzle with 360-degree swivel
- Check valve

Applications

Compatible Equipment

Excavators, Land levellers, Pavers, Road rollers
